To Whom It May Concern:

It is my pleasure to recommend Brayan Byrdsong for a software developer position.

Brayan has worked as a software developer at ZeeZor under my supervision for around a year and a half. I have thoroughly enjoyed my time working with Brayan, and he is a very valuable asset to any team. He is hard working, excited about software development, and always ready to learn.

His knowledge of Angular 1.x/2 and expertise in other areas of JavaScript programming has been a huge advantage to the whole team. His in-depth JavaScript skillset along with his intuitive CSS styling standards has made him a leader at our company for front-end web development.

Along with his front-end expertise, Brayan has been completely hands-on in developing backend web services written in Java and can intuitively analyze and structure RESTful APIs.

I confidently recommend Brayan to join your team. As not just a talented software developer, but as a kind and considerate person, I know he will be a strong leader at your organization.

Please contact me at 678-923-7694 or mlisivick@gozeezor.com and I would be happy to discuss Brayan's qualifications and work experience at ZeeZor.

Best,

Matt Lisivick
Lead Developer
